

MMS Service Providers (MMSC)

There are many service providers offering MMS services today. We try to update this list regularly; however, we cannot guarantee that all of the service providers mentioned below are working fine.

If there's a service provider that's not working well, we appreciate your comments. Also, if there's a service provider missing that could be valuable for others, please let us know.

We try to keep this list up-to-date, so **please send your comments** to neoi@neoi.de

NOTE:

When there is no port number mentioned for the WAP Gateway, use **port 9201** for MMS 1.x versions and **port 8080** for MMS 2.x versions. MMS 2.0 is currently not supported by the ActiveXperts SMS and MMS Toolkit, so make sure you are using port 9201 (default).
