To Test WAP settings go to WAP >>> Enter Address: <http://www.emxi.com>  
OPTION>>>GOTO>>> Page will open and show the word image. To download the image click on that word

To Test MMS, NOTE: it depends on the agreements between the different service providers. If Service Providers have no agreements, after sending MMS You will receive a SMS message with a website address, where you can download the MMS from. If you sent within the same Service provider, you will see the red progree sending bar, 100% and then show SENT. Shortly after will receive the picture on the other Mobile Phone.
