How to allocate Speed Dial numbers

To set phone numbers for speed dialing, select Menu > Settings > Phone Setup > Speed Dial. On the Speed Dialing screen, you can edit phone numbers for speed dialing at unset number keys, or delete the available phone numbers for speed dialing. You can choose to delete available phone numbers and set new ones. The number key 1 might have been reserved for voicemail service.

How do I change my Ringtone and the Volume?

To change your ringtone or Ring Volume, you must go and edit your User Profile. To do This, you can either use the Quick Key by Pressing the “Left” key on your joystick while being on the home screen or by going to Menu > Settings > User Profiles. Here you will find a list of different User Profiles. Select one that you would like to change. After selecting the desired Profile, you will be asked to either “Activate” or “Customize”. Select the “Customize” option. Once you select Customize, you will be given a menu where you can either chose to edit the ringtone by choosing “Tone Setup” or you can go to “Volume” to adjust the volume of the ring tone.

How do I add my own ringtone?

First make sure that the file you wish to use is compatible with the phone. Also, make sure that you know the location of the file. Go to Menu > Settings > User Profiles and select the profile that you want to edit. Then select it and chose the “Customize” option. Then select the “Tone Setup” option. Select the item you want to edit. You will see a list of ring tones already pre loaded on your phone. To add a new tone, simply scroll down to “<Empty>”. Press “Ok” and then select “Replace”. Then follow the options to find the location of the file you wish to use. And press “OK”. The file is now added to your list. You can now select it and chose to make it your ringtone.

How do I change my Ringtone to Vibrate?

You can either keep the “#” key pressed for over a second from your home screen to activate the Silent mode or, go to Menu > Settings > User Profiles and edit one of the profiles.
